

Effective Jan. 1, 2015, certain drugs under the Humana Medicare formularies will have new limitations or will require utilization management for the 2015 plan year. These changes could mean higher costs or new requirements for Humana members who use these drugs. Humana encourages the use of generic and cost-effective brand medications whenever possible.

High-risk medications (HRM) have the potential to be problematic in those 65 years of age or older. Below is a list of some commonly used HRMs that have Humana Medicare formulary limitations or utilization management edits in 2015 (e.g., prior authorization (PA) requirements, step therapy (ST) modifications and nonformulary (NF) changes). Humana members are asked to talk to their health care provider about possible alternatives.

Impacted drug	2015 National 4 Formulary Formulary ID: 15083	
	Drug impact: (Utilization edits/ Noncovered/Tier changes)	Possible alternative
glyburide-metformin	Tier change	Please consult with your doctor
glyburide	Tier change	Please consult with your doctor
glyburide micronized	Tier change	Please consult with your doctor
cyclobenzaprine	Prior authorization	baclofen
estradiol	Tier change	Please consult with your doctor
Transderm Scōp	Prior authorization	meclizine
trimethobenzamide	Tier change	Please consult with your doctor
diphenhydramine HCL	Prior authorization	levocetirizine
clomipramine	Tier change	Please consult with your doctor
Promethegan	Tier change	prochlorperazine

Legend	
Humana plans on this formulary	Humana Gold Plus, Humana Group Medicare National, Humana Group Medicare Enhanced National

To see prescription drug information for Humana Medicare members, please visit **Humana.com** at <https://www.humana.com/provider/medical-providers/pharmacy/rx-tools/drug-list>. Click “Drug list search” and enter the drug name. Choose “Medicare” to see the drug’s tier placement in Medicare formularies and any restriction that may apply.

Please note: Many medications considered to be high-risk in the elderly will have a formulary status change or a utilization management requirement for 2015. For a list of high-risk medications (HRM) and possible alternatives, please go to <http://apps.humana.com/marketing/documents.asp?file=1578031>.
