OVERVIEW

Each single service dental HMO plan delivered or issued for delivery by an HMO must include an HMO delivery network that is adequate and complies with Insurance Code §843.082. There must be a sufficient number of specialists are available and accessible, within the HMO's service area to meet the dental care needs of the HMO's enrollees.

When contracted providers are not available within the TDI mileage access and/or availability standards outlines in 28 TAC §11.1607, DentiCare, Inc. provides for in-network benefit coverage in a variety of ways depending on the type of provider and the specific medical need of the patient. The most common practices include:

- 1. Negotiating ad hoc agreements with local providers within the access standards. Ad hoc agreements prohibit balance billing of members.
- 2. Paying in-network benefit levels for providers contracted with DentiCare, Inc. HMO products. Agreements prohibit balance billing of members.
- 3. Paying in-network benefit levels for non-contracted local area providers within the mileage standards. Balance billing prohibited.,
- 4. Assisting members in identifying contracted providers in alternative specialties within the mileage standards who are qualified to treat the condition. When using contracted providers in-network benefit are paid and providers are prohibited from balance billing the member.
- 5. When no appropriate providers are available within TDI mileage and/or availability standards, in-network benefits will be paid for the nearest reasonably located contracted provider or a reasonably located and/or available non-contracted provider. Contracted providers are prohibited from balance billing the member.
- 6. To further prevent balance billing we calculate plan payments using the providers billed charges as the basis for the allowable charges.
- 7. Member shall be held harmless in all instances.

See detailed worksheets for access information by county and by specialty.

County			
(whole or part)	Provider type	Reason Network Providers Not Available	General Description of Day to Day Procedures
