

Flu vaccinations: A simple way to save lives

The Centers for Disease Control and Prevention (CDC) recommends that anyone 6 months or older receive an annual flu vaccine.

In addition to those 6 months or older, the following patients are at increased risk of infections and complications:

- Pregnant women
- Children, especially those 2 years or younger
- People aged 50 or older
- People of any age with certain chronic medical conditions, including asthma, diabetes and chronic lung disease
- Immunosuppressed people of any age
- People living in nursing homes and other long-term care facilities
- People living with or caring for those at high-risk for flu complications, including:
 - Healthcare workers
 - Household contacts of people at high risk for flu complications
 - Household contacts and out-of-home caregivers of children younger than 6 months (these children are too young to be vaccinated)

To facilitate correct billing and payment, administration and vaccine codes are needed for each vaccination claim. Administration codes for influenza vaccination are **90460, 90471, 90472, 90473**, and/or **90474**. Vaccine codes can be found on the next page.

Additional information

- **Pediatric providers:** The flu vaccine should be obtained through the Vaccine for Children (VFC) Program. Humana will only reimburse for the administration claim code that is in accordance with the Medicaid fee schedule.
- **Adult providers:** Adult flu vaccine is covered as an expanded benefit. Humana will pay for the flu vaccine and administration code that is in accordance with the Medicaid fee schedule.

For answers to questions about Humana's policies for flu vaccination coding or coverage, please call Provider Services at 800-477-6931, Monday through Friday, 8 a.m. to 5 p.m. Eastern time.

Administration code	Description
90460	Immunization administration through 18 years old via any route of administration, with counseling by physician or other qualified health care professional. First or only component of each administered vaccine or toxoid
90471	Immunization administration (percutaneous, intradermal, subcutaneous, intramuscular) one vaccine (single or combination)
90472	Immunization administration (percutaneous, intradermal, subcutaneous, intramuscular) each additional vaccine (single or combination)
90473	Immunization administration (intranasal or oral) one vaccine (single or combination)
90474	Immunization administration (intranasal or oral) each additional vaccine (single or combination)

CPT code	Description
90655	Influenza virus vaccine, trivalent (IIV3), split virus, preservative free, 0.25 mL dosage for intramuscular use
90656	Influenza virus vaccine, trivalent (IIV3), split virus, preservative free, 0.5 mL dosage for intramuscular use
90657	Influenza virus vaccine, trivalent (IIV3), split virus, 0.25 mL dosage for intramuscular use
90658	Influenza virus vaccine, trivalent (IIV3), split virus, 0.25 mL dosage for intramuscular use
90672	Influenza virus vaccine, quadrivalent, live (LAIV4) for intranasal use
90674	Influenza virus vaccine, quadrivalent (ccIIV4), derived from cell cultures, subunit, preservative- and antibiotic-free, 0.5 mL dosage for intramuscular use
90682	Influenza virus vaccine, quadrivalent (RIV4), derived from recombinant DNA, hemagglutinin (HA) protein only, preservative- and antibiotic-free for intramuscular use
90685	Influenza virus vaccine, quadrivalent (IIV4), split virus, preservative free, 0.25 mL for intramuscular use
90686	Influenza virus vaccine, quadrivalent (IIV4), split virus, preservative free, 0.5 mL dosage for intramuscular use
90687	Influenza virus vaccine, quadrivalent (IIV4), split virus, 0.25 mL dosage for intramuscular use
90688	Influenza virus vaccine, quadrivalent (IIV4), split virus, 0.5 mL dosage for intramuscular use
90756	Influenza virus vaccine, quadrivalent (ccIIV4), derived from cell cultures, subunit, antibiotic-free, 0.5 mL dosage for intramuscular use
90694	Influenza virus vaccine, quadrivalent (aIIV4), inactivated, adjuvanted, preservative free, 0.5 mL dosage for intramuscular use
