

PrescribeIT Rx

Offering patients potential savings, safety and the convenience of mail delivery

PrescribeIT Rx wants you and your patients to have the information you need to determine which pharmacy will best suit their needs. PrescribeIT Rx might be the right choice for your patients, and here's why:

COST SAVINGS OPPORTUNITIES

- With 90-day pricing and low-cost alternatives, PrescribeIT Rx may help reduce your insured patients' prescription drug costs.
- Many Medicare Advantage members receive Tier 1 and Tier 2 generic medications for a \$0 copayment. Ask your patients to check their plan materials to find out if their plan offers this pricing.

EASIER ADHERENCE

- PrescribeIT Rx notifies patients by phone when their prescriptions need to be refilled and when their refills are about to run out.
- Patients avoid trips to the pharmacy, making it easier to adhere to their therapy.

ACCURACY AND SAFETY

- Advanced technology helps ensure accurate medication dispensing.
- PrescribeIT Rx pharmacists review each new prescription for accuracy and possible drug-to-drug or drug-to-disease interactions.
