

# Population Insights Compass

## Innovative technology for better health outcomes

Population Insights Compass is a centralized reporting platform that offers value-based healthcare providers and office staff actionable data to improve their patients' health and well-being.

### Key Features:

- Provides detailed clinical, financial and quality reporting for Medicare, Medicaid and commercial lines of business
- Lets users build customized reports
- Generates predictive modeling data to identify potential adverse events
- Enables creation of risk-stratified patient lists for targeted care
- Lets users upload documentation to close gaps in care
- Enables users to compare their performance to market performance
- Features appealing dashboards to display key performance indicators
- Offers bookmarking for most-utilized locations to expedite report generation

## Delivering Solutions

### Simplifying the Experience

Empowers providers by reducing administrative burden, enabling them to return to their mission of serving patients

### Connecting Healthcare

Fosters collaboration between healthcare providers, patients and payers by breaking through data silos for better cost and health outcomes

### Personalizing Care

Leverages data-rich patient insights to support care management and identify opportunities for timely interventions that can increase healthy days

### Provider Testimonials:

*"I particularly love the ease of use for the provider practices so they can really engage in their patients' care." — Julia Fish, Executive Director of Medical Operations, Claremedica MSO, LLC*

*"Compass is very user friendly and gives you all the information needed to care for patients." — Yashekia Scarlett, MBA, Market Manager of Care Coordination, HCA Healthcare*
