

Drug Recall for Firvanq® (Vancomycin Hydrochloride for Oral Solution)

As you may know, Azurity Pharmaceuticals, Inc., a company that makes Firvanq® (Vancomycin Hydrochloride for oral solution), Vancomycin 50 mg/mL Kit is voluntarily recalling one lot (lot #21035; expires 07/31/2022) of this drug that is prescribed as treatment for Clostridium difficile-associated diarrhea and Enterocolitis. The drugs are being recalled because they are found to incorrectly contain a First Omeprazole (FIRST-PPI) diluent instead of the Firvanq diluent bottle.

Patients who receive these drugs may be receiving doses that are above or below those recommended on the label. Receiving the wrong dose of Oral Vancomycin may lead to persistent diarrhea associated with dehydration and electrolyte abnormalities, recurrence of Clostridium difficile (C. difficile) infection, its progression to severe colitis, colon perforation requiring colectomy, and potentially death. To date, Azurity has not received any reports of adverse events related to this recall.

What this means for you:

- It is important that you do not abruptly stop taking your medication. Talk to your doctor or healthcare provider about switching to another medicine or obtaining the same medicine that is not part of the recall.
- To determine if your medicine is affected, you should look at the drug name and company name on the label of your prescription. If the information is not on the bottle, you should contact the pharmacy that dispensed the medicine.
- Please refer to the FDA website¹ for the most current updates to this drug recall <https://www.fda.gov/safety/recalls-market-withdrawals-safety-alerts/azurity-pharmaceuticals-inc-issues-voluntary-nationwide-recall-one-lot-firvanq-vancomycin>
