

How to change your primary care physician

Your primary care physician (PCP) is the doctor or other healthcare provider that delivers the majority of your preventive care and services. You get to pick your PCP and can update (or change) your PCP if needed.

Your PCP will work with you to direct your healthcare and:

- Give you checkups (usually once a year, for people 3 and older)
- Give you necessary immunizations (shots)
- Treat most of your routine healthcare needs

Your PCP may send you to other physicians or specialists, or admit you to a hospital, if needed.
