

Simplify the credentialing process with ADA[®] Credentialing Service, powered by CAQH ProView[®]

The ADA[®] credentialing service powered by CAQH ProView[®] makes it easier for dentists to submit and maintain their professional and practice information in one central place. This complimentary service improves upon the traditional credentialing process by centralizing and standardizing a single credentialing application. Your information will be accessible to Humana and the dental plans you choose, free of charge.

One application, many dental plans

Dentists enter their professional information and supporting documents once, and choose which participating organizations have access.

Centralized, standardized and secure

CAQH ProView[®] is a single credentialing application accepted in all 50 states, which is committed to protecting and securing private healthcare information. CAQH ProView is HITRUST[®] CSF certified.

Go digital! Spend less time with paper and more time with your patients.
