

Medicare Advantage: Continuous glucose monitors available at pharmacy in 2024

Effective Jan. 1, 2024, continuous glucose monitor (CGM) access is expanding to the pharmacy.

To improve ease of access for Humana Medicare Advantage (MA) members, CGM supplies (transmitters, receivers/readers and sensors) will be made available through pharmacies at the point of sale, including CenterWell Pharmacy®.

Coverage will be available at the pharmacy for the following products (starting Jan. 1, 2024):

- Dexcom G6 receiver, transmitter and sensor
- Dexcom G7 receiver and sensor
- FreeStyle Libre 2 reader and sensor
- FreeStyle Libre 3 reader and sensor
- FreeStyle Libre 14-day reader and sensor

CGMs were previously available for Humana MA members only through national durable medical equipment (DME) vendors. Members will still be able to access these CGMs through a national DME vendor.

Please note:

- Members need to satisfy Centers for Medicare & Medicaid Services (CMS) criteria to purchase CGM supplies through the pharmacy at the point of sale or through a national DME vendor.
- Members' Medicare Part B cost share under their plan is the same, whether the CGM is obtained through the pharmacy at the point of sale or through a DME vendor.
- A prior authorization may be required if a member's use of CGM supplies is not consistent with CMS criteria.

Questions?

If you have questions about a member's CGM coverage through the pharmacy, please call the number on the back of the Humana member's ID card.
